This is in response to Applicant's amendment filed on December 05, 2004 in which claims 1, 7, 11 and 25 were amended.

Status of Claims

Claims 1-25 are pending.

Allowable Subject Matter

Claims 1-25 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a glossary management tool that makes it easy for each client to customize terminology to the needs of a particular business. With this tool, termed a glossary manager, a company can customize a number of feature names in the system to provide a more familiar context for their users. The closest prior art [Desai et al. U.S. Patent no. 6,072,904 in view of Schultz U.S. Patent no. 5,721,902 and further in view of Hoffert et al. U.S. Patent 5,903,892] disclose a method for use with a system for storing digital media records. However, they fail to show the methodology of **receiving from a first user, a change to one of the parameter that define an extent to which a search engine expand search terms; receiving from a second user, a search request and performing, by the search engine, a search determined by the search request and determined by the stored parameters and reporting the search results to the second user.** This claim feature being present in independent claim 1 render claim 1 allowable over the prior art of record. Claims 2-6 are allowable over the

prior art of record because the prior art of record fail to show a methodology for a user to send a query by first, selecting information from a display portion and second, providing text information and performing a search with respect to the first and second information. Claims 7-8 are allowable over the prior art of record because they fail to show the claimed feature of ranking the second selected digital media records downward for at least one second selected digital media record that was selected by at least one first user or by a plurality of first users. Claim 9, 13-25 are allowable over the prior art of record because they fail to show the claimed feature of ranking the second selected digital media records downward for at least one second selected digital media record that was selected by at least a predetermined number of times by first users. Claim 10 is allowable because the prior art of record fail to show displaying said first selected digital media records presented in an order, said order defining a first-presented first selected digital media record; logging the event of a first user purchasing said first-presented first selected digital media record; and reporting to a second user, the frequency of occurrence of the logged event. Claims 11-12 are allowable because the prior art of record fail to show displaying said first selected digital media records presented in an order, said order defining a first-presented first selected digital media record; logging the event of a first issuing several consecutive search requests, and receiving respective first selected digital media requests greater in number than a predetermined threshold for said several consecutive search requests; reporting to a second user, the frequency of occurrence of the logged events.
